FOR IMMEDIATE RELEASE

URADICS launches Search Engine Optimization SEO Training Course

URADICS is very happy to announce the launch of its second super specialty Search Engine Optimization SEO Training Course. The course has been carefully developed after a long research and using insights from our first hand experience with our customers. The course caters to a huge variety as it moves from Basic to Intermediate level and is offered in classroom based and online training model.

Internet is growing at a very fast pace and millions of pages are being added to the web daily. Over the years search engines have emerged as one of the leading medium for information sharing and we do see them in this strong position for a long time. There a huge shortage of highly skilled and motivated individuals in the SEO industry.

“It gives me immense happiness to launch this training course. Many individuals claim to know SEO but unfortunately there are only a handful of them who can actually utilize the full potential of what search engines have to offer. We believe that this course will enable individuals to get a deeper understanding of the search engine optimization process and help them get employment to the career of their choice.” says Pulkit Agrawal, Director, URADICS.
